DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 10-15, 17-28 and 30-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Ray '371.

Ray discloses in figures 1-11 a device for insertion between two boney structures comprising an elongated body 10, having an outer surface (fig. 1), along a longitudinal axis between a distal end and a proximal end, a helical thread 12 formed on at least a portion of the outer surface, the thread includes at least one deviation (the v-shape is a deviation to a sharp point), the elongated body includes at least one opening (the spaces between the threads 12), a hollow interior (fig. 1), the opening interrupts (the spaces between threads 12 interrupt the threads) the helical thread, the helical thread is twisted (a helical is twisted in order to be formed) and a fusion implant material that includes bone (col. 10, lines 18-22).

As for claims 19-28 and 30-31, Ray discloses an implant comprising a body 10, having a leading and trailing end (fig. 1), mid-longitudinal axis, at least one projection 12, extending from the exterior surface, being configured to resist backward rotation of the body, the elongated body includes at least one opening (the spaces between the projections 12), a hollow interior (fig. 1), the opening interrupts (the spaces between the

Art Unit: 3764

projections 12 interrupt the projections) the projection, the projection is twisted (the projection is a helical and a helical is twisted in order to be formed), the projection is a thread 12, a tab (the outer edge of 12) and a fusion implant material that includes bone (col. 10, lines 18-22).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 16 and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ray '373 in view of Ray '740.

Ray '373 discloses in figures 1-11 a device for insertion (a spinal implant), substantially as claimed. However, Ray '373 doesn't disclose the helical or the projection being blunt. Ray '740 teaches in figure 1 helical thread 12 having a valley that is blunt (col. 3, lines 56-60). It would have been obvious to one having ordinary skill in the art at the time that the invention was made that the thread or the projection disclosed by Ray '373 could be fabricated blunt as taught by Ray '740 in order to allow the mating peaks of the female threads to have adequate strength.

Response to Arguments

Applicant's arguments filed July 17, 2006 have been fully considered but they are not persuasive. Applicant argues that Ray '373 and Ray '740 aren't prior art. However, the structural limitation pertaining to the thread including at least one deviation isn't

Art Unit: 3764

disclosed in the parent application. Thus, the examiner is interpreting the earliest effective date of Ser. No. 10/740,747 as 12/19/03.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Brown whose telephone number is 571-272-4972. The examiner can normally be reached on 5:30 am-4:00 pm Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gergory Huson can be reached on 571-272-4887. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
